PROFESSIONAL SUMMARY

- Skilled in modern web technologies including HTML, CSS, JavaScript, and frameworks such as React. Proficient in backend development using Node.js, Python with extensive experience in database management (SQL)
- Reliable and collaborative developer with strengths in generating technical and design requirements that improve performance and accessibility. Hardworking team player with problem-solving, ideas-sharing approach to full stack development.
- Passionate about continuous learning and thriving in challenging work environments, committed to delivering innovative solutions while staying abreast of industry trends.

EXPERIENCE SUMMARY

- Currently working as Software Developer at dugong global services since 2023
- Previously worked at VSaaS Innovation's as a Python developer from Mar 2023 to Sep 2023

WORK EXPERIENCE

SOFTWARE DEVELOPER

dugong global services   09/2023 to present

- Played a major role in this startup, acting as a Software Developer.
- working on smart contracts in Rust, providing **debugging support** and code solutions.
- Successfully uploaded several crates to crates.io under the name 'dharitri'.
- Designed and developed an employee portal for the company using the MERN stack.
- Implemented features such as leave management, payslips, and daily work time tracking.
- Utilized React for building interactive and dynamic user interfaces.
- Managed and maintained the MySQL database, ensuring data integrity and security.

PYTHON DEVELOPER

VSaaS Innovation's   03/2023-08/2023

- Developed a full-stack e-commerce website with all the functionalities similar to Flipkart
- Utilized Python, React.js, Node.js, Express.js, and MySQL to create a robust and scalable platform
- Collaborated with a cross-functional team to ensure seamless integration of frontend and backend components.

PROJECTS

- **E-Commerce Website Mini Project:** Built a full-stack e-commerce platform with comprehensive functionalities.
- **Employee portal:** Implementing employee portals with features such as leave management, payslips, and daily work time tracking.
- **Full Stack To-Do App:** Created a to-do application using Puppeteer for sending automatic OTPs to email for user login.
